

CFO CONTROL TOWER

Federal Budget and Spend Management

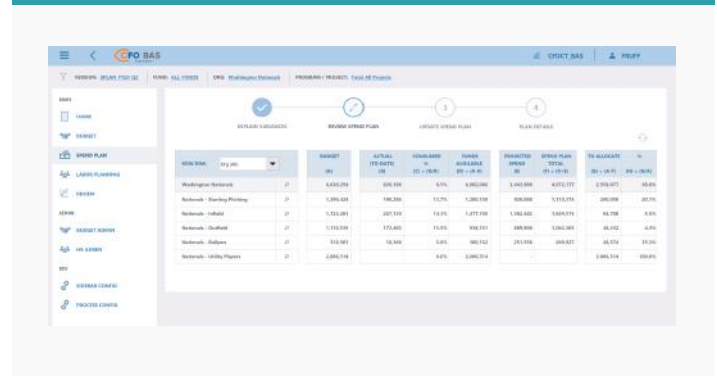

The CFO Control Tower includes industry best practices for your budgeting process. Our budgeting solution is preconfigured to meet the typical needs of Federal budgeting organizations and is designed to improve and automate a wide range of planning, forecasting, consolidation, and financial reporting requirements.

TRADITIONAL APPROACH

- Not an application – screens, forms, and calculations are manually created
- No automatic integration from sheet to sheet or book to book
- Likely contains calculation errors
- Mostly undocumented and unsecured
- Difficulty with version control, especially when budget preparation is decentralized with multiple layers of inputs
- Difficult to enforce data integrity between multiple versions
- Manually required to build charts and tables
- Minimal ability to integrate process flows and approvals

CFO CONTROL TOWER APPROACH

- Out of the box input templates, reports, logic, and process flows that support the Federal budgeting process
- Fully integrated and easily rolls up detail to summary
- Fully tested to ensure accuracy
- User and data security out of the box
- Professional documentation included
- Pre-built reports and dashboards
- Centralized database enables historical integration and user security
- Full support for multiple versions, top-down and bottom-up budgeting
- Integration with financial systems for accurate reporting and tracking of actual spending compared to budget

Federal Budgeting and Execution, Performed the Right Way

RELIABLE

Extensive reporting capabilities. Natively integrated with the CFO Control Tower enterprise reporting solution. Provides the ability to drill down into actual data to understand spending actuals vs. budget projections.

FAST

High-performance capabilities. The CFO Control Tower provides quick response times even when working with high volumes of data.

SECURE

Fully integrated user and data security. Our solution is available in the AWS FedRAMP cloud.

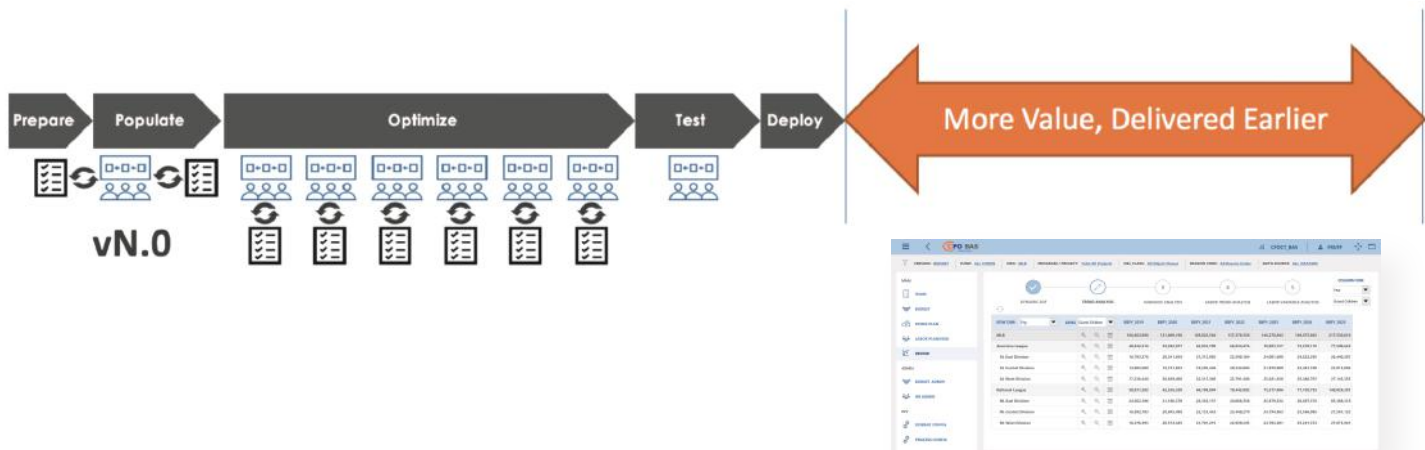

INTEGRATED

Easily integrate budgets from multiple organizations into one overall agency budget. Our solution integrates data from multiple sources into one solution.

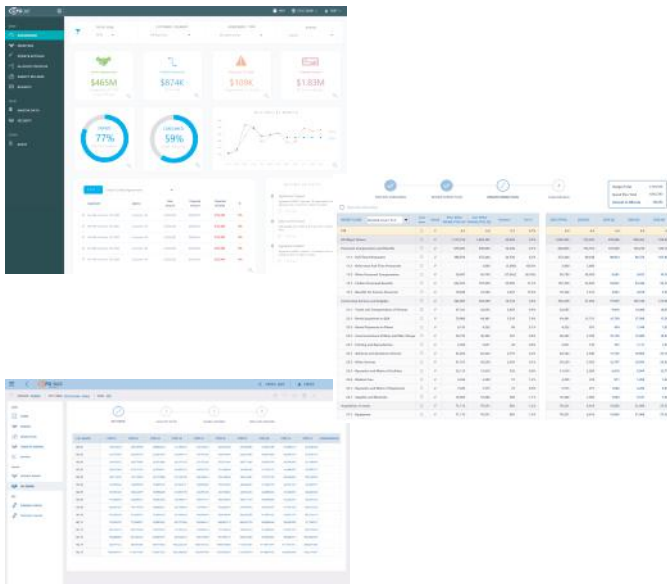

CFO CONTROL TOWER

Federal Budget and Spend Management

Save time, save money. Our budgeting solution is preconfigured with templates, process flows, input screens and Federal specific data (grades, step, locality, spending codes) which allows Federal government organizations to focus on the gaps, rather than developing a solution from scratch.
